EXPERIENCE

Inspire Brands | *Software Engineer II (UX Focus)* | Atlanta, GA · Aug 2024 – 2025

- Rebuilt checkout cart workflows end-to-end across web and mobile apps including item modifiers, price recalculations, seasonal deal logic, promotion eligibility, and bundled pricing rules integrated with REST APIs, significantly improving e-commerce accuracy and reducing order errors.
- Coordinated cross-functional delivery of e-commerce checkout rebuilds across Arby's, Sonic, and Buffalo Wild Wings. Managed scope, timelines, and cross-team dependencies between engineering, QA, and product simultaneously across three brand platforms.
- Wrote test coverage strategy for core checkout components. Identified and resolved CI/CD pipeline failures blocking release cycles across the organization.
- Led planning and execution of Optimizely A/B experiments with data analysts such as defining success metrics, aligning stakeholders on hypotheses, and managing iterative rollouts from test design through production.

NCR Voyix | *Solutions Engineer* | Atlanta, GA · Jul 2022 – 2024

- Scoped, managed, and delivered the NCR SCO 2024 3D configurator, coordinating engineering, sales, and marketing against a hard conference deadline, resulting in 2,000+ qualified leads and measurably shorter sales cycles.
- Rebuilt and maintained ncrvoyix.com using WordPress and custom JavaScript/CSS scripts, delivering branded web experiences and landing pages that support marketing and sales campaigns for enterprise audiences.
- Delivered iterative prototyping, user feedback collection, and cross-functional design reviews from concept through conference launch.
- Managed delivery of custom B2C analytics dashboards for enterprise clients (Walmart, Starbucks) using React, Looker SDK/API, and Victory.js, from initial requirements through client-facing sign-off.

NCR | *UI/UX Engineer* | Atlanta, GA · Jun 2020 – 2022

- Modernized legacy design system end-to-end. Established shared tokens, built reusable component libraries (React, React Native, TypeScript, Storybook, SCSS, Material UI), and drove adoption across web and mobile product teams.
- Collaborated with product and sales stakeholders to translate enterprise client requirements into scalable, well-documented UI components and workflows.
- Led agile workflows across Banking, Retail, Payment, and Digital Connected Services departments, running code reviews, sprint ceremonies, backlog management, and deadline enforcement.
- Mentored junior engineers and interns, systematically building team capacity and reducing senior resource bottlenecks on the delivery of critical work.

Student Bridge | *UX Researcher & Software Engineer* | Atlanta, GA · Jul 2019 – Jun 2020

- Automated large-scale data ingestion using Python, Chromium, and custom parsing pipelines, feeding structured educational metrics into PostgreSQL databases, eliminating manual research and data entry workflows.
- Managed end-to-end development and launch of campuscompare.com. Coordinated design, backend, content, and QA across an aggressive timeline with multiple stakeholders.
- Built internal Vue.js and Node.js tools informed by research findings, improving sales team efficiency and marketing analytics workflows.

CORE COMPETENCIES

Project Management: Agile/Scrum, sprint planning, roadmap ownership, stakeholder alignment, scope management, risk mitigation, release coordination

Technical Depth: React.js, React Native, Next.js, TypeScript, Node.js, Python, REST APIs, CI/CD, Git

Tools: Figma, Storybook, Optimizely, Jest, Looker SDK/API, PowerBI, JIRA

EDUCATION

Georgia State University — B.A. in Computer Science
